4.1 About ADF Mobile Browser Skinning. Skinning enables a page to display consistently on a variety of devices through the automatic delivery of device-dependent style sheets. These style sheets enable the optimal display of pages that share the same page definitions on various mobile browsers. Within these style sheets, which enable you to set the look and feel of an application, you not only tailor a component to a specific browser by setting its size, location, and appearance, but you ...

See the section Skinning ADF Mobile Applications in the ADF Mobile Developers Guide for more info. In a skin addition we can define a cascading stylesheet (CSS) that contains custom styles that should be applied to ADF Mobile user interface controls. This also allows us to get rid of the inline styles and use the cleaner approach of defining a style class instead. The first step is to create a ...

Hierzu ist es notwendig, für jede der unterstützten Plattformen, eine eigene CSS-Datei anzulegen. Einen guten Einblick hierzu gibt der Skinning Guide von Oracle. Der mobile Browser eignet sich gut dafür, bestehenden Webanwendungen eine mobile Komponente zuzufügen. Gängige Situation ist daher eine bereits vorhandene Applikation. Das ADF Framework bietet die Möglichkeit, diese zu exportieren und als .Jar-Datei in das mobile Entwicklungsprojekt einzubinden. Dies hat den Vorteil ...

Oracle ADF Faces Skinning 101. Skinning uses the standard Cascading Style Sheets (CSS) language to specify colors, fonts, icons, and images for Oracle ADF Faces components. The style definitions are decoupled from the generated HTML component output, which makes custom look-and-feel definitions easy to write and maintain. The style definitions are dynamically added to the generated HTML page ...
