Commonly highlighted themes about difficult conversations. Having taught palliative care and communication skills over the years, I recognise that these difficult conversations are different for everyone. However, there are common themes and the difficult conversations that many professionals say they fear or even avoid include: Explaining DNACPR. Also remembering that not 'resuscitating' still means that people can receive other active treatment and care.

Difficult Conversations in Medicine. Good communication is the solution, or part of the solution, in nearly every difficult interpersonal situation, whether between husband and wife, supervisor and employee, student and teacher, or patient and physician. In medicine, good communication is necessary for the establishment of a therapeutic alliance between patient and physician. Through good ...

While difficult conversations can be stressful, you can navigate them calmly by having an inquisitive attitude and being genuinely interested in what the other person says. Try starting the conversation off by explaining the issue and immediately asking them for their perspective. As much as you may want to keep the conversation emotionless, someone is bound to get upset, so make sure to ...
