Who Goes First? by Lawrence K. Altman was published on 31 Dec 1998 by University of California Press.

[Who Goes First?: The Story of Self-Experimentation in ...](#)

Who Goes First? tells their stories and thus gives us a view of medical research that diverges from the alienation of the nameless number heads. Lawrence K. Altman has pursued research on the subject of medical self-experimentation since his days as a medical student, and this personal interest shines throughout the book. His writing is smart and enthusiastic, shedding light on a little-discussed aspect of research that raises important questions of ethics and scientific validity ...

This shows the limit of self-experimentation; we only have one self and a single datum is not generally sufficient to prove a theory. 8 Food. Since the first person starved to death it has been obvious that humans need food. What is less obvious is what happens to it once it is inside you and why it seems we excrete less than we take in. In the early 17th century a doctor called Sanctorius ...
